

SLINFOLD GOLF CLUB

COMMERCIAL

COWAN
ARCHITECTS

ABOUT THIS PROJECT

Cowan Architects was commissioned to develop proposals for the redevelopment of Slinfold Golf Club with the aim of securing the long-term viability of club by adding function and conference facilities along with overnight accommodation and a new state-of-the-art golf academy. Using the existing clubhouse as the focal point of the site, we designed a sympathetic extension to accommodate a new conference centre / wedding venue for up to 230 people and a new 70-bedroom hotel. In addition we remodelled and altered the existing clubhouse to provide additional restaurant facilities and additional spa facilities to improve facilities for existing members.

In conjunction with the works to the main clubhouse, we also designed a new state-of-the-art golf academy incorporating interactive Augmented Reality (AR) classrooms and teaching bays alongside 2,000sq.ft of retail space and observatory eatery which enjoyed views over the driving range and 9-hole course.

Planning approval has been obtained and it is hoped that works will commence soon.
